Countryside Jobs Service Weekly
Special Edition 20 February 2006

Endorsed by both the Scottish Countryside Rangers Association & the Countryside Management Association

Seasonal and Volunteer Work Supplement

From Volunteer to Staff.

Tom Bridge has always lived in the countryside and knew he wanted a countryside related job but his schools didn't offer any countryside or environmental subjects. So with A levels under his belt he went on to further education gaining a qualification in financial economics – about as far from rural skills as you can get. After graduating he wasn't really sure what direction to take and what career path to follow. "My Mum saw an advert for volunteer wardens in the back of an RSPB magazine and suggested that I give it a go", said Tom. "I did two weeks in January 1999 at Titchwell Marsh Reserve in Norfolk and didn't go back home for ten months, I'd found what I wanted to do." Whilst volunteering Tom made ends meet initially on the dole – yes, you can claim JSA whilst working as a full time volunteer if you are still actively seeking paid employment, what the Job Centre considers to be a proper job! – and then working in a pub; he was also fortunate in having parents able to help with certain costs as well. During his time as a volunteer the RSPB helped Tom to complete an NVQ in Landscape and Ecosystems and since then has sent him for practical skills training.

In November 1999 Tom started paid work with a three month winter contract and was never out of work for several years. He is now a warden on the RSPB Dearne Valley Reserve, one of the RSPB's flagship sites. Tom says, "I manage habitats on the reserve for the target species. I also make sure the reserve infrastructure is safe and user-friendly for the public. I have been on courses to drive tractors, use chainsaws, do tree surgery and quad biking, plus courses on personal development and management skills. Today I have spoken to the grazier, agricultural dealers, members of the public, volunteers and the media – and it's only lunchtime.

There is no 9 - 5 and you have to be prepared to work weekends, Bank Holidays or even Christmas Day. It is more of a vocation than a job. I live on site, which is fantastic; I have a 250 acre back garden. One of the most rewarding times is the survey season, when we get up at first light to count the breeding birds. That is when you see the results of your hard work. Looking back I realise I took the most appropriate route, you can't get a job in conservation without spending time as a volunteer."

For others wanting to follow in his footsteps Tom has two pieces of advice. First; volunteer as much as possible, go out of your way to find conservation groups (every uni has one somewhere!) and join in. And second; be sure it's what you want to do, volunteering is a good way to dip your toe in the water without taking the plunge. Conservation work is rarely glamorous, it's hard, dirty, physical work interspersed with boring office admin; although the financial rewards are not high seeing the results of your labours more than compensates. Tom finishes, "I am certainly grateful that my Mum suggested volunteering for those few weeks in Norfolk. It was probably the best thing I ever did."

RSPB VOLUNTEER WARDENS REQUIRED

Long-term placements available on various reserves around the UK. These opportunities will offer practical experience in various aspects of reserve management, with training provided as appropriate (eg chainsaw use, ATV, tractor driving, brushcutter). Applicants should be willing to commit themselves for 4 - 6 months and are ideally for those planning a career in conservation, either during or following an academic qualification. Many previous such volunteers have moved on to paid employment within the conservation sector. Minimum age 18. (Age 21 with full driving licence preferable). Various start dates. Accommodation provided free on or near reserve. Bird knowledge desirable but not essential.

Please see our web-site www.rspb.org.uk/volunteering/residential for brochure and application form.
The Scottish Wildlife Trust (SWT) is a leading conservation charity in Scotland and relies on the commitment and energy of hundreds of volunteers each year to get the job done. The Trust manages more than 120 wildlife reserves in Scotland and campaigns for wildlife through lobbying parliament and working with local and national organisations.

Although around half of all SWT volunteers work on wildlife reserves and there are many other vital jobs carried out by volunteers that don’t involve a spade or work gloves. So, you could find yourself digging out drainage ditches to prevent water-logging or sorting and scanning photographs for the Trust’s image database. Perhaps you would prefer to tackle invasive species with a bow-saw or organise the publicity for a reserve open day.

Many volunteers come to the Trust to gain experience for a job in conservation. The key is to start volunteering as soon as possible, perhaps while you are still studying. This way, you can accrue considerable experience by the time you are ready to apply for that paid job. It also demonstrates to potential employers that you are committed to the cause. Even if the volunteering you do doesn’t exactly match the paid work you want – it all looks good on your CV!
For example, Amy took on the voluntary job of looking after a small wildlife reserve in Edinburgh while she was studying for an HND in Countryside Management at a local agricultural college. There was plenty of tidying up, planting of wildflowers, pruning of hedges and path maintenance to keep her busy. Shortly after completing her course, Amy got herself a paid Countryside Ranger job within the Cairngorm National Park. The work Amy had done on the reserve definitely helped place her above the other job applicants.

You will not have to commit huge amounts of time. In most cases volunteers give a day each month or perhaps half a day each week, depending on the duties involved and there will always be a member of staff or an experienced volunteer available to provide support and direction.

The Trust also offers training and work experience for people who have been unemployed for six months or more. Under the New Deal scheme Lantra certificates are offered for chainsaw use, brushcutting, treeplanting, footpath construction, and post and wire fencing, amongst others.

All of the Trust’s current volunteering opportunities are advertised on SWT’s website at www.swt.org.uk. Email enquiries@swt.org.uk or call 0131 3127765. For more information about New Deal please email pgilbert@swt.org.uk.

Scotland:

Scottish Squirrel Survey
Standard Red and Grey Squirrel Surveys. Volunteers needed to help monitor Scotland’s squirrel populations by helping to set up and take part in standard surveys at selected forests and red-grey interface sites. Surveys are needed in most parts of Scotland. The surveys are aimed at various levels of experience; training will be provided. Contact: Mel Tonkin at the Scottish Squirrel Survey, Email: mtonkin@swt.org.uk; or phone 0131 312 4733 to find out about your local surveys.

The National Park Volunteer Programme offers a variety of Volunteer Roles such as Conservation, Events, User and Wildlife Surveys or Photography. Come and join the team of Volunteers! To find out more contact Zoe Morris, Volunteer Development Officer, Loch Lomond & The Trossachs National Park, 01389 722600 or email zoe.morris@lochlomond-trossachs.org.
Wildlife Recorders

The Wildlife Counts Project in Falkirk, Stirling and North Lanarkshire is seeking enthusiastic volunteers to attend FREE workshops, which will offer volunteers the skills to become local wildlife recorders.

Events will include indoor and outdoor workshops (spring 2006 to autumn 2007); volunteers will learn how to identify plants and animals, how biological recording is done and why.

No previous experience required.

For more information, contact Claire McSorley on brisc-wcp@btcv.org.uk or 01786 474 061.

---

Scott Wilson Scotland Ltd requires 6 seasonal field assistants to carry out ecological monitoring on farmland at various locations around Scotland in spring/summer 2005. The contract will run from early-April until early-July, with definite dates still to be confirmed. A competitive salary and expenses is available to successful applicants.

Surveyors must be competent at identifying a range of birds and vegetation (including grasses and sedges) and be comfortable working outdoors, away from an office, for extended periods of time. Knowledge of agricultural practices in Scotland would also be desirable, as would self-motivation and adaptability. Successful applicants must hold a UK driving licence.

If you are interested and feel you have the necessary skills then please apply preferably by e-mail, enclosing a CV and covering letter, highlighting your experience and suitability for the post, to Reuben Singleton at reuben.singleton@scottwilson.com or 23 Chester Street, Edinburgh EH3 7ET. Applications should be sent before 3rd March 2005 and interviews will be held during week commencing 13th March 2005.

Information about Scott Wilson is available on the Company website www.scottwilson.com.

---

Heritage Environmental Ltd

natural resource consultancy & countryside management service

Great Crested Newt Triturus cristatus

Torchlight Surveying
(March to May inclusive)

Torchlight survey for Great Crested Newt is typically carried out in the Spring when breeding adult Great Crested Newt Triturus cristatus are abundant in breeding ponds/waterbodies. Peak numbers are recorded in ponds in the height of the breeding season (April to late May - there is some geographical variance). During this season the Great Crested Newt is engaged in elaborate courtship displays and are easily counted in the open, shallow areas of the pond. Distinguishing characteristics such as the jagged dorsal crest and silvered tail stripe of the male Great Crested Newt are key identifiable traits, alongside notable courtship displays with females.
At night Great Crested Newts tend to move up from the pond depths into shallower, open areas where they can perform their mating rituals. Surveys are conducted 30 to 90 minutes after dusk on dry, mild, calm nights and involve a thorough survey of the accessible shoreline. The waterbody is worked progressively around whilst scanning with the light beam of a high candlepower torch enabling a broad band from the waters edge to be surveyed. The entire margin of the pond is walked once and a count of Great Crested Newt and other Amphibians made. It is normal practice to record all Amphibians, and in addition, for all Newts, their species and sex.

Torchlight surveying in the Spring is a suitable technique for measuring relative abundance of Great Crested Newt and other Amphibians within waterbodies, and alongside other appropriate survey techniques, assessing presence/absence of the species.

Staff require good identification skills to be able to identify Amphibian species by torchlight, and more often than not, when they are on the move. In addition, a good appreciation and awareness of health and safety issues when working next to waterbodies. Life jackets, wellingtons, site maps and head-torches are invaluable equipment. The work is carried out at night and can often be cold so a hat and a pair of gloves is a good idea too. Fortunately there are not too many midges during the peak torching season, but a welly full of water is not uncommon!

Heritage Environmental Ltd., 50 High Street • Auchterarder • Perthshire • PH3 1DB

Great Crested Newt Conservation Handbook
This book covers important aspects of great crested newt ecology, habitat requirements and survey techniques, amongst many other topics.

If you would like a free copy of this guide please contact Dorothy Wright, Great Crested Newt Conservation Officer, The Herpetological Conservation Trust, 655A Christchurch Road, Boscombe, Bournemouth, Dorset, BH1 4AP Tel: 01202 391319 dorothy.wright@herpconstrust.org.uk

An A4 S.A.E. with 83p or £1.07 to cover 2nd/1st class postage costs would be appreciated.

The Scottish Countryside Rangers Association is the professional organisation for Rangers and other countryside staff in Scotland with links throughout the UK and internationally.

SCRA was founded in 1974, and aims to promote and encourage high standards of professionalism amongst Countryside Rangers, through the development of communication and exchange of ideas amongst its members and with other organisations.

SCRA's views and opinions are sought from many quarters and we are active within Scottish LINK, a partnership environmental lobby group. The Association organises a series of training events, social gatherings and an Annual Training Conference which brings together Rangers from across Scotland. In addition, we are hosting the International Ranger Federation's Congress in Stirling June this year. This will see over 250 rangers from throughout the world meeting to progress skills, methodologies and discuss issues related to community engagement and protected area management.

Upcoming training courses from SCRA include Dogs and the Law, Emergency First Aid, Management Planning, Water Safety & Management, Water Voles, Grassland Management, Interpreting Fungi with Children, Interactive design and construction, Lichens, Hazardous tree management and Animal First Aid. For more information on SCRA or any of our activities visit our website at www.scotranger.freeserve.co.uk

**Interview with Liz Appleton, Countryside Sites Officer, Worcestershire County Council.**

How long have you been in your present full time long term appointment? I have been in my current (full-time permanent) post since June 2004 – 19 months.

Where and when did you start in your quest to work in the countryside? I have always had an interest in wildlife and the countryside and became involved with voluntary groups, after a while I realised that I wanted to do conservation/countryside management for a living.

At the beginning what qualifications and experience did you have in this sector? Initially I had no relevant formal qualifications. I returned to university as a mature student, completing an MSc as a conversion course to adapt my previous qualifications. My first qualification had an ‘environmental’ part to it and I did have qualifications in other relevant skills, such as first aid certificate, computer skills etc. My experience had come partly from upbringing, but mainly from volunteering.

What type of volunteering work have you done? I started a general BTCV volunteer becoming more involved over time and helping lead day tasks (I am sure having a camper van that could take people and bicycles helped!). Whilst studying I joined the university conservation volunteers, and also had two part-time voluntary roles – one as a Ranger and one as an education ranger. Even when getting paid work I continued volunteering (and still do), although the emphasis changed. Through becoming involved in species monitoring and survey on a voluntary basis, I am now licensed. I continue to do a lot of voluntary work of this type.

At the time did you consider the experiences to be worthwhile and useful to your progress? Has your attitude changed since becoming ‘properly employed’? I certainly found the experience useful. By being on hand and willing I was given, and took, the opportunity to gain experience in a whole range of things. and over time accrued a lot of hands on experience, which was enough to convince employers that I was experienced. There is no doubt that the volunteering I did launched me on my career.

Now that I am employed, and involved in recruiting staff, I look at people’s voluntary experience as well as their paid experience. Some of the things often looked for in staff are motivation and commitment. I do, however, look at voluntary experience with a critical eye, and particularly the difference between one of the crowd and someone with responsibility.

What level of responsibility and stature were you given as a volunteer, can you give an example? As a general conservation volunteer, I started leading day tasks with a local group. Being a voluntary Ranger was the most relevant experience, I started devising and leading guided walks, work parties and education events. I had a recognised role with clear responsibilities.

Was it easy to volunteer as well as support yourself financially? No! I could not afford to volunteer full-time. I was studying a full-time MSc (funding myself), volunteering 2 days per week and fitting in a variety of paid work to top up the money I had saved before I returned to study. It kept me busy…

Did you manage to get any funding and support for living and for further professional development during your time volunteering? One of my volunteer jobs paid mileage, had I stayed longer I would probably benefited from some formal training.

During your volunteering where there many chances to network and talk to people in the sector? Yes. Volunteering in two different places simultaneously in roles with a different focus meant I met a wide range of professionals and could see things from different view points. I also took the opportunity to meet people, even if it meant going on extra days or evenings. By being willing, people were prepared to gain me their time and share their knowledge.

What type of seasonal and short term work have you done? My first paid work as a Ranger was for two days before Christmas making Christmas crackers with children – 100 each day. My boss was ill and they needed someone at short notice - as I was the volunteer around it was offered to me. Not your ‘typical’ Ranger work perhaps, but it was paid and earned me some goodwill. I could then say that I had been employed and so it all began.
Then I had a 3 month part-time contract as Biodiversity Officer for a local authority, writing their local BAP. My first full-time post was as a seasonal ranger for 5 months – a lot of very routine stuff, but if we covered our core work we could then take on other projects of interest or gain experience where it was lacking. Through this I broadened my experience. Then a maternity cover post – the post was advertised as for less than 2 months, but once I got the job I negotiated a longer contract. Then a 15-month fixed term contract (timescale linked to project funding). Then a full-time permanent post… And now another one.

**How was this work obtained?** The Biodiversity Officer post was obtained through contacts I had made at University and volunteering. After that I have got all my jobs responding to ads in the CJS. **Approximately how long did it take you from when you decided you wanted to enter this sector to gaining full time, long term employment?** About 4 years.

**The cost of volunteering.** Volunteering can be a costly business. Living away from home, possibly renting accommodation, travelling to your placement, the list goes on and as the name implies you will be working as a volunteer and not for money. What you get in return is that vital experience, training in relevant skills, lots of contacts for the future and the opportunities to prove your employability. Many organisations will pay expenses &/or travel. If you are eligible you can claim Job Seekers Allowance (dole as was) and being a full or part-time volunteer should not affect your eligibility or the amount of JSA you receive as long as you follow a few basic rules for good practice.

The fundamental criteria are: 1. that you are available and actively seeking work and 2. that you receive no more than out-of-pocket expenses. External training courses (ie with someone other than your placement organisation and the course paid for by the organisation) can be sticking points; however, if you can prove that this training is essential for you to have these skills to do the allotted tasks safely then it is usually accepted and doesn't affect JSA – but not always! The Employment Service / Benefits Agency produces two leaflets which help to explain the situation: WK4, Financial help if you are working or doing voluntary work and JSAL7, Jobseeker's Allowance. Voluntary work when you're unemployed and it needn't affect your benefits! You may also find their website, www.jobcentreplus.gov.uk useful.

**England – Anglia:**

**The Graduate Resource Team** offers contract Project work of between 2 & 12 months for recent graduates (<3 years’) committed to working within the environment / sustainable development sector. Opportunities involve: work with local authorities, businesses & community & vol orgs. Register online www.studentforce.org.uk & send a copy of CV.

**The National Trust's Careership Training Programme**

The National Trust is Europe's largest environmental conservation charity, protecting some of the Nation’s most precious countryside, coastline, landscaped parks and gardens, and historic properties across England, Wales and Northern Ireland. The Trust’s award-winning Careership Training Programme develops our future Gardeners and Countryside Wardens to help keep these special places special, for everyone to enjoy. It has been tremendously successful and, each year starting in mid-March, we recruit around 21 new Trainees into inspiring, specially selected NT gardens, countryside or coast to begin the three-year programme. Trainees...
Companies of all sizes in the Conservation, Countryside & Environment sector are discovering that Apprenticeships are the best solution for improving their businesses.

They’re finding that they act as an effective recruitment tool that enables them to attract and retain the best staff, creating a loyal and motivated workforce. In England today, 255,500 young people are currently undertaking an Apprenticeship in 130,000 businesses in over 80 different sectors of industry. Research reveals that one-fifth of job vacancies - 135,000 – remain unfilled because of a lack of skilled applicants. Moreover, half of employers reporting recruitment difficulties said they were losing business to competitors as a result of the lack of skilled workers. Apprenticeships are central to the Learning and Skill Council’s drive for skills development and for this reason they are committed to spending around £800 million per year on funding them.

Lantra, the Sector Skills Council for the environmental and land-based sector is an independent, employer-led charity which represents 17 industries and over 1700 job roles including agricultural crops and livestock, farriery, environmental conservation and game and wildlife management. Developing qualifications that meet employer’s needs is an important part of Lantra’s work, and through its industry groups, identifies the need for Apprenticeships and develops appropriate work-related frameworks that meet the need of industry. Most Apprentices receive a wage from day one and research shows that on average Apprentices receive around £137 per week after deductions. Employers receive a financial contribution from the LSC to offset the cost of the Apprenticeship training. Most small businesses use an external college or training provider to provide the ‘off site’ learning element of the Apprenticeship. Local LSC offices can advise on the most suitable Apprenticeship for a company’s needs, and direct employers to suitable training providers in the area.

To find out more about Apprenticeships visit www.apprenticeships.org.uk, or call a specialist advisor on 08000 150 400.

To find out more about Lantra, the Sector Skills Council for the environmental and land-based sector, visit www.lantra.co.uk

**BTCV Volunteer apprentice scheme**, provides the environmental sector with trained and experienced staff and volunteers. Inspiring People, Improving Places. BTCV connects people with place, builds healthy, sustainable communities, and increases people’s life skills. It aims to create a better environment where people from all cultures feel valued, included and involved. www.btcv.org

---

**Learn their gardening or countryside skills both from our own members of staff and from attending Reaseheath College in Cheshire, for several block weeks per year. The scheme is really our version of an apprenticeship, and we help all of our Trainees to find permanent work with us at the end of their training. A number of our past apprentices have gone on to much bigger things within the Trust. Dan Billington is now a Warden at Buscot and Coleshill Estates in Oxfordshire and wanted to be a Warden ever since he was a teenager and did his training at Trelissick in Cornwall. Dan says “In the three years I trained, I learnt absolutely loads; from how to lead a guided walk to the best way to carry out habitat surveys. I’ve learnt about livestock, built fences, hung gates, felled and planted trees, supervised volunteers and delivered talks to groups. Driving tractors, using chainsaws, brushcutters, welders and all manner of hand tools became easy, and I soon picked up the construction skills to put it all together. I learnt a lot ‘on the job’ thanks to the Area Warden. He gave me loads of support and guidance: I soon felt really confident doing my practical work. At college we learnt about all the other habitats you might come across working as a Warden, from heathland and wetlands to sand dunes. I also met the trainees who I would get to know over the next three years at College. We were all different age groups, and being based at different properties meant we all came with different experiences.” You can read more about Dan’s experiences on www.naturenet.net. Vicky Cody is now a Senior Gardener at Hidcote Manor Garden in Gloucestershire, having switched from a job in London, merchandising for a high street jeweller. Vicky says “My placement was at Antony in Cornwall. Instead of getting frustrated with commuting, I found myself caring for 100 acres of formal and woodland gardens. Every day meant planting borders, pruning roses, composting and chopping wood. And in my breaks, I could eat my sandwiches in a grove of Magnolia, Rhododendron and Camellias! It was all a real breath of fresh air… but I’m not saying it was easy. There was a surprising amount of mechanical skills I had to pick up at college and on the job. From taking rotavators apart to understand how they worked, to routine maintenance for ride-on lawn mowers, I discovered a whole range of technical know-how I would never have imagined mastering. It wasn’t all learning techniques and practical skills though. My favourite lesson was plant anatomy. We memorised ‘plant idents’ - the Latin names for hundreds of plants. You could soon see the plant families growing from their Latin roots. It was really fascinating, like learning a new language.” The National Gardens Scheme is also proactive in supporting our scheme with a generous donation each year - www.ngs.org.uk.

If you would like to find out more about Careership and the National Trust, please go to www.skilledfutures.org.uk where there is a wealth of information.

REF VOL-DIRECT-OK-3 JOB VOLUNTEER OFFICER
BE4 ? LOC LEEDS
PAY 0 FOR BTCV SKELTON PROJECT
DES / BUT We are a popular & busy project that depends on our VO team to help deliver our education activities, manage our wildlife area & promote our work to others. There are almost always vacancies. Excellent choice for anyone contemplating a career working with children & / or the env. All vols will be involved in delivering env education activities for school & community groups & some site management. Specific duties depend on the current team. Please feel free to contact the project staff to discuss the current situation. In return for your time we will help you develop important skills to increase your employability. Gain experience in practical conservation, wildlife & cside skills, organisational & publicity skills, project liaison etc. You will get help with benefit claims, career choices & preparation of job applications. We have a particularly good record of seeing VOs into employment. ASK Sarah Taylor, 0113 2430815 skelton@btcv.org.uk

England – South:

Herts & Middlesex Wildlife Trust. Volunteers can get involved with projects on our reserves and in the county. Including BOTANICAL surveying between March and September and weekly practical RANGER/WORKPARTY events throughout the year. Ideal for those wanting to gain experience and support wildlife. Contact: 01727 858 901 or charles.nathan@hmwt.org.

Lee Valley Regional Park Authority Volunteer Programme
There are many volunteer roles available all year round. Key roles are practical conservation tasks, biological surveying, or natural history information officer’s. To join one of our teams visit the web site www.leevalleypark.org.uk or call the volunteer manager on 01992 709845.

Careers in the Countryside
The CLA will be launching a new initiative at this year’s Devon County Show (Saturday 20th May) which will offer a link between young people, teachers, careers advisors and others in education and the jobs which are available and how they contribute to the management and enhancement of the countryside.
Involved in training is available in many disciplines, which is ideal for those wishing to broaden their skills base.

Expand the GPS activities & recruit new vols. Part time vol needed to organise & lead a programme of tasks. Help with worker, & able to offer 3 dpw of volunteering, with 6-12 mths commitment pref. ASK Info: Mark Vallance, Reserves Officer; markvallance@bbowt.org.uk 01865 775476. Apply: send a CV to Mark Vallance, BBOWT, The Lodge, Armstrong Road, Littlemore, Oxon OX4 4XT.

Volunteer Required for Summer Term

The Centre requires a volunteer from Tuesday 18th April until Friday 7th July 2006 (these being the ideal dates but there would be a possibility of some flexibility). This is our busy summer period doe school visits and the volunteer would assist the Head of Centre with these visits, by preparing worksheets and equipment and then assisting with the school group. This would be ideal work experience for someone considering a career in environmental education or teaching. Please send a CV to the centre and if suitable, an informal interview will be arranged. Bramley, Tadley, Hants RG26 5BJ T: 01256 8802094 E: info@bramleyfrith.co.uk

Special trees and woods in the Chilterns

Those living and visiting the Chilterns now have the opportunity to explore, understand and record their special trees and woods, thanks to a grant awarded by the Heritage Lottery Fund to the Chiltern Woodlands Project.

Special trees and woods are found throughout the Chilterns and the project hopes to find and record them so they can be celebrated and managed sensitively and sustainably.

Liz Manley has been appointed to manage the Special Trees and Woods Project and will be coordinating a team of volunteers to research the history of special trees and woods in records, photos, paintings, maps, books and direct from local people themselves.

Liz said “I am pleased to be part of this is an exciting new project. It is also great to be back in the Chilterns where I started my career. For those still trying to get their first job in conservation it is a brilliant project to be involved in - training is available in many disciplines, which is ideal for those wishing to broaden their skills base.”

This three and a half year project aims to involve up to 50 registered volunteers and offers some diverse tasks for volunteers. Under the supervision of experts, volunteers will collect data, oral histories and photographs relating to special trees and woods which will be identified by the public.

So, if you have an interest in local history or the environment, want to learn more and try volunteering then don’t hesitate to get in touch with Liz on 01844 355 525 or lmanley@chilternwaonb.org

Volunteers Required

Join a volunteer conservation group working on an exciting new project upgrading countryside paths to enable access for people with disabilities and visual impairments. The group meets every Friday, 10am-5pm, BTCV, 62 Parker Rd, Hastings. Bring: packed lunch, warm/waterproof clothes, strong boots/shoes. Call Anna on 01424 446395.

England – London:

Practical Conservation

Take part in a practical conservation session at one of our reserves. Try your hand at tree planting, pond clearing, mowing a meadow and more. Get fit, make friends and have fun in the great outdoors and leave knowing you've done your bit to help out London's wildlife. Everyone is welcome and no experience is necessary, all tools and training are provided. Bring your lunch for longer sessions and always make sure you have warm, waterproof clothing and stout footwear. Many reserves have opportunities to get involved with surveying, open days and reserve management too.
Contact 020 7261 0447 enquiries@wildlondon.org.uk or visit our website www.wildlondon.org.uk

Check www.wildguides.co.uk or telephone 01628-529297 for further details.

**Can you tell frogspawn from toad spawn?**

**Do you know the difference between hawthorn blossom and blackthorn?** *

*If so your help is needed.*

Once again the BBC, in association with the Woodland Trust and CEH, are overseeing Springwatch 2006 – the biggest phenology project of its kind on the planet. Last year 157,000 recordings from 70,000 observers were logged but more data is required this year.

You don't have to be a Biological Records Officer or a Hirundinidae (that's swallows to you & me!) expert to take part. Neither do you have to put aside days or weeks, a few minutes is all it takes. There are six key indicators to watch out for: 1. frog spawn; 2. seven-spot ladybird; 3. red-tailed bumble; 4. peacock butterfly; 5. flowering hawthorn; 6. swift (ID information is available online at bbc.co.uk/springwatch). If you first spot one while walking the dog, on your way to a meeting or out repairing a broken stile then send in your observation by text message, eg spring frogspawn, to 63399, online at bbc.co.uk/springwatch or using one of Springwatch postcards available from your local library.

Results will be posted online for you to follow progress.

*just in case you can’t – frogspawn comes in lumps and toadspawn in strings, hawthorn flowers when the leaves are open and blackthorn blossoms on bare wood.*

? = no info/unclear [yes] = yes that is what it says p/t = part-time
The Countryside Management Association

“The voice of Countryside Professionals for over 40 years”

Formed in 1966, the Countryside Management Association (CMA) has grown into the leading membership organisation for individuals involved in the sustainable management of the countryside and urban greenspace in England and Wales. One of the aims of CMA is to:

“be an effective and professional membership organisation offering its members a structure for their Continuing Professional Development”

One of the ways of doing this is by providing information, training and authoritative comment on countryside and urban greenspace issues. CMA members throughout the regions host training or study days. Training days are orientated to specific topics/disciplines that offer a learning opportunity whilst study days focus on specific sites or projects that share management experience; best practice & networking opportunities. These days are run by existing CMA members and provide an excellent opportunity of refining or adding new skills to an individual’s cv free of charge.

Students; Volunteers and those just embarking on their careers can join CMA as an Affiliate Member. A special “CJS” discounted rate of just £17.50 for unwaged affiliates and £25 if waged, will enable you to take advantage of 12 months of CMA training and study days together with the added benefit of networking with professional countryside practitioners from around your region.

Additional CMA membership benefits include RANGER magazine which is published quarterly and includes articles, news, reviews and regular features. Professional Development of members is encouraged through an ongoing and systematic Continuing Professional Development structure whilst the CMA annual residential training seminar on current topical subjects offers an opportunity to meet colleagues from a range of professional disciplines for networking and socialising.

Since its formation over 40 years ago, the association has seen many changes in our profession. It has continued to adapt to meet the challenges arising from these changes, and with a membership of over 600 is proud to be recognised throughout the industry as the voice of the Countryside Professional.
